Driven and Self-taught by design.

A few years ago, I moved to London,
not knowing a word of English
and having almost no work experience.
Two years later, I was fluent in English and
had developed a strong work ethic and a career.
I am driven, I learn fast, I work hard, I have a strong desire
to learn, and I am a team player.
But most of all, I am a logical thinker, a problem solver,
and I just love building stuff
Eat. Sleep. Code.

Experience and Skills

· **Javascript frontend frameworks** for web applications such as React and Redux
· **Frontend UI libraries and frameworks**, such as Bootstrap and React-Bootstrap
· Performing **UX/UI design activities**
· Build web applications by using **responsive HTML/CSS practices**
· Security frameworks for **authorization and authentication**
· Creating and executing **unit testing and debugging**
· **Version control systems** such as GitHub
· **Creation and deployment of APIs**
· Use **third party APIs** with Authorization requirements
· SQL **database**
· Design and development of **full-stack** web applications
· Efficient **data structures** and analizes algorithms with **BigO notation**
· Follow **accessibility** best practices
· Production of fully functional applications writing **clean code.**
· Heavily **problem solving** oriented.
· Excellent **time managment**

Projects

WalkKit
Website that tells you the best times to walk your dog based on weather conditions.
Vanilla JavaScript
Accessibility
Testing
Third Party API

Scheduling Software
WebApp to help managers and business owners to make their eployee's weekly schedule.
